

Product name BITUTEK SBS 50

Description

SBS **BLOCK OF MODIFIED DISTILLED BITUMEN** is an adhesive and waterproofing mass, made of modified distilled bitumen and SBS polymers highly resistant to ageing; pre-fabricated in blocks

Technical characteristics	Norm	Unit	Values	Tolerances
Type of compound			SBS	
Softening RingBall	EN 1427	°C	105	100-120
Filler content	DIN 52005	%	40	Č45
Penetration at 25°C	EN 1426	1/10 mm	30	25-50
Consumption	-	Kg/m ²	2/3	
Processing temperature	-	°C	Max 230°C	
Peel resistance at 90°C on concrete	EN 12316-1	N	50	>40
Packaging	-	-	20 kg blocks 60 pcs. Pallet / 1200 kg	

Use of product

Generally, these are used to paste the first layer of bitumen membrane to the concrete of the road planked structure. SBS blocks of modified distilled bitumen have the following advantages :

- they can be applied to uneven surfaces
- are resistant to temperature variations
- have a great adhesive power to the supporting structure before and after ageing

Storage and maintenance :

The original packaging has been designed for the ideal storage of the product. Once opened, the goods must be kept away from the sun and other heat sources
